Handout 3-B: My Weekly System

Session 2 · about 40 minutes, plus 5 minutes to schedule your Sunday reset

This handout holds three pieces of your weekly system: a plan for one real week, a triage note for when the week gets heavy, and a one-line decision about your tools. Plan in layers: fixed commitments first, then focus blocks for your hardest work, then a buffer. Whatever is left is flexible time.

Weekly plan skeleton

Use one real upcoming week. Give each focus block a named task and a strategy from your Strategy Toolkit card (Handout 2-D).

	Mon	Tue	Wed	Thu	Fri	Sat	Sun
Fixed commitments							
Focus block (task + strategy)							
Focus block (task + strategy)							
Buffer							
Sunday reset (15 min)							

Priority-triage note (busy week)

Write every task for the week on the Eisenhower Matrix, then sort it here. Circle at least one “schedule” item and make sure it is in a focus block.

Do now (urgent + important)	Schedule (important, not urgent)	Delegate or shorten (urgent, not important)	Drop or defer (neither)

Tool decision (one line): “I’ll use ___ for my calendar or planner and ___ for notes because ___.”

The Sunday 15-minute reset. Once a week, look at the week ahead, move or cancel what won’t fit, and name your top three tasks. It grows out of the weekly reflection prompt in Handout 1-E.

Notes

- **Productivity tools.** Be skeptical of hype. A tool is useful if you will open it daily. Paper planners are a fully valid choice.
- **Focus-time methods.** Short timed work intervals (for example, 25 minutes on, 5 off) help some people start. Use them if they work for you, and drop them if they don’t.
- **Options.** A digital calendar, a paper planner, a wall calendar, or sticky notes on a single sheet.

Worked example

	Mon	Tue	Wed	Thu	Fri	Sat	Sun
Fixed commitments	Class 9–12, work 5–9	Work 8–4	Class 9–12, work 5–9	Work 8–4	Class 9–12	Family day (from noon)	Free
Focus block (task + strategy)	12:30–1:30: Biology, blank-page retrieval	4:30–5:30: Stats problem set, practice questions	12:30–1:30: Biology, Day 3 retrieval	4:30–5:30: Stats, interleave with Biology	1–2: Psychology reading, SQ3R		
Focus block (task + strategy)			4–4:30 (before work): Flashcards, 20 minutes			9–10: Paper outline	
Buffer	2–4 p.m.	Evening	2–3:30 p.m.	Evening	2–5 p.m.	Evening	2–4 p.m.
Sunday reset (15 min)							7 p.m.

Triage note:

Do now	Schedule	Delegate or shorten	Drop or defer
Stats problem set (due Friday)	Paper outline; Day 3 Biology retrieval	Group chat logistics (ask someone to summarize)	Reorganizing my notes app

Tool decision: “I’ll use a paper planner for my calendar and my phone’s notes app for notes because I look at the planner every morning and I always have my phone.”
